

YOHAN GABRIEL MELÉNDREZ LEAL

Ciudad Obregón, Sonora, México | (52) 6442583721 | yohan.melendrez24@gmail.com

EDUCATION

Instituto Tecnológico de Sonora (ITSON) Ciudad Obregón, Sonora
Software Engineering (Degree in progress) August 2022 – May 2026

- **Certifications:** Satisfactory Performance Testimony Ceneval EGEL in Software Engineering (January 2026).

PROFESSIONAL EXPERIENCE

Wrap-up

Frontend Developer April 2026 – Present

- Led the frontend development of "Wrap-up Connect," creating key functionalities such as a multi-step user registration flow, documentation pages, and high-impact landing page components using Angular 21, Tailwind CSS, and AWS.
- Collaborated on the architecture and implementation of an administrative panel with Angular Material to optimize system operations and user management.
- Ensured code quality and maintenance through periodic refactoring and bug fixes (hotfixes), optimizing frontend performance.

Undersecretariat of Digital Government of the State of Sonora

Frontend Developer (Professional Internship) August 2025 – December 2025

- Led the digitalization of critical functions for the "Digital Communications Agenda" system within an Agile team.
- Optimized user interfaces using TypeScript and HTML5, achieving efficient integration with backend services in .NET.
- Ensured the stability of critical modules by executing rigorous unit tests before deployment to production.
- Managed version control and workflows with Git, guaranteeing continuous releases without technical conflicts.

FEATURED TECHNICAL PROJECTS

SaaS Asset Manager (AssetManager) Spring Boot, Angular, MySQL

- Deployed a scalable platform for centralized management of corporate licenses (AWS, Google Workspace) hosted on Vercel.
- Monitored employee assignments via an interactive dashboard, optimizing visibility of cloud asset status.
- Programmed an automated alert system to prevent license expiration and ensure operational continuity.
- Built a robust RESTful API with JWT security and architecture based on Docker containers.

Rifando-ando: Raffle System NestJS, PostgreSQL, Tailwind

- Designed a role-based management system that increased transaction security between buyers and sellers.
- Optimized complex queries in PostgreSQL databases using Prisma ORM to improve server response time.
- Developed a responsive interface with Angular, prioritizing accessibility and user experience on mobile devices.
- **Itson Market: Student Commerce Platform** Node.js, Express, Custom Middleware
- Designed and implemented a decoupled architecture based on the Model-View-Controller (MVC) pattern and services using Node.js, facilitating future system scalability.
- Ensured user transactions and maintained data integrity by developing and integrating custom validation middleware.

TECHNICAL SKILLS AND LANGUAGES

- **Programming Languages:** TypeScript, JavaScript, Java, HTML5, CSS3.
- **Frameworks and Libraries:** Node.js (NestJS), Spring Boot, Angular, .NET (Entity Framework), Tailwind CSS.
- **Databases and ORMs:** PostgreSQL, MySQL, MongoDB, Prisma ORM.
- **Infrastructure and Tools:** Docker, Git, Postman, pnpm, Vercel, Render.
- **Languages:** English (Professional Proficiency for technical reading and communication); Spanish (Native).
